

# ***FIBA Canning – Still building the world’s largest CNG Trailers***

February 13, 2012

FIBA Canning has built the world’s largest, compressed natural gas (CNG) tube trailers since the 1980’s. These 16 tube, Superjumbo CNG trailers were the first of their kind built and carried more compressed natural gas (CNG) than any tube trailer ever built before.

**They still remain the largest CNG super jumbo trailers ever built.**

These trailers went into Virtual Pipeline service. Contact [sales@fibacanning.com](mailto:sales@fibacanning.com) for your tube trailer quote, or call Ken Canning @ 905-231-1899.
